Subject:	Touch base, happy Nee Year. A business idea.

Hi Yakov
I hope this email finds you well and happy.
Happy New Year to you and the Whole Family. The Dog included.
A business idea: As a result of a new regulation which will be completed in few months to increase competition in the financial
Sector in Israel, the two biggest banks, HaPoalim and Leumi will have to sell within two years the control and within the third year all their shares) in their respective credit cards businesses.
This is somewhat similar to distressed assets situation because the businesses are cash cows and they have to sell them against their will.
